

UI Audit Checklist - v1.0

Mac Xiang / mactokyo.com - free for personal and commercial use

1. One semantic H1 per page; logical H2/H3 hierarchy
2. Color contrast $\geq 4.5:1$ for body text, $3:1$ for large text
3. Visible keyboard focus states on all interactive elements
4. Explicit width/height on images to prevent layout shift
5. Tap targets $\geq 44 \times 44$ px on touch devices
6. Form inputs have associated labels
7. Descriptive alt text on meaningful images; empty alt on decorative
8. Prefers-reduced-motion respected for animation
9. Responsive behavior verified from 320px upward
10. Error states and empty states designed, not default
